31 January 2024

SO UPS for the first time has released the assessment of the fulfilment of the Scheme & Program of Power Systems Development of the Russian UPS

The Report shows the results of the implementation in 2023 of the Scheme & Program for 2023-2028. The Scheme & Program is developed annually for a 6-year period.

The report contains the following data:

- actual capacity demand, peak demand in 2023;
- actual capacity demand compared with forecasted data provided by the Scheme & Program for 2023-2028 period;
- comparison of the forecasted demand in line with the Scheme & Program for 2023-2028 vs. 2024-2029 period;
- planned vs. actually commissioned/closed facilities, as well as capacity mix transformation;
- analysis of capacity mix transformation (by types);
- planned vs. completed transmission projects (>110 kV lines) in 2023.

In conformity with the Rules of Dec. 2022 the Report grounds on the data and documents submitted by the utilities and consumers and has to be published by SO UPS annually by February 1.

In line with the amendments of June 2022 to the Federal Law on Electricity a new scheme of long-term development planning has been in place since January 1st, 2023. The Scheme & Program for 2023-2028 and 2024-2029 (approved by the Federal Ministry of Energy) are published at SO UPS official website.

ENDS.
